Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a pry bar, classified in class 254, subclass 25.
- II. Claims 12-15, drawn to a method of making a pry bar, classified in class 29, subclass 428.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another process. For example, the product can be made in a single casting process rather than have a process that has a forming and a subsequent inserting step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
